

STONY PLAIN SUN.

VOLUME SEVEN.

STONY PLAIN, ALBERTA THURSDAY, MAR. 31, 1927

Who

The Lutheran Church and Sunday Observance

Thou shalt sanctify the Holy Day. In answer to the question: What does this mean? the Lutheran Catechism answers: We should not despise preaching and His Word but hold it sacred and gladly hear and learn it.

Accordingly Sunday is properly observed, not by mere cessation from work and play but by hearing the Word of God. He that is of God heareth God's Word.—John.

The Lutheran Church teaches that Sunday is not of Divine origin. It is not a Divine institution. It is not a substitute for the Old Testament Sabbath. Sunday is observed because Christians have agreed to set aside one day out of seven for public worship. Innocent plays and sports and even work are not sinful provided such activities do not keep anyone from hearing God's Word, and provided they are not forbidden by the laws of the land.

Let no man, therefore, judge you in meat, or in drink, or in respect of an holy-day—or of the Sabbath days, which are a shadow of things to come; but the body is of Christ.—Col 2, 16.

LOCAL NEWS.

Inspector J. A. Fife gave the local public school the once-over on Thursday last.

Mrs. W. J. Kerr, has returned home, after a visit with her mother, Mrs. L. Nieman.

Mr. Otto G. Wadel, the implement agent, reports business as picking up, in his line, with good prospects for a very busy spring season.

The High School Lit. are holding their regular fortnightly meeting in the school-house tomorrow afternoon. The pupils of grade eleven are presenting the program on this occasion.

Local merchants are being inundated with the large quantities of hen fruit which are now finding their way to market.

A well-attended Lutheran service was held last Sunday afternoon at 2.30 o'clock in St. Oswald's Anglican Church by Rev. G. Puetzsch of Spruce Grove. Members of the Spruce Grove and Rosenthal congregations living at Stony Plain and other Lutherans without church connection are invited to attend. The next service will be held at St. Oswald's Church on Sunday, April 10, at 2.30 p.m.

There was a good attendance, last evening, at the regular Wednesday service, held during the Lenten season by Rev. B. Eberhart in St. Matthew Church (Missouri Synod). These services will conclude on Wednesday next, April 6th.

The card party held Friday evening under the auspices of the Curling Club proved to be a very successful affair, about a dozen tables being in operation. Winners—Lady's 1st, Miss Hyslop; consolation, Mrs. Robbins. Men's 1st, W. J. McCulla; consolation, E. J. Kibblewhite. Dancing followed the card playing.

Rev. C. Thies, field secretary of the Walther League, on Friday brought to Stony Plain immigrants, to be distributed among local farmers. These had left the old land under the auspices of the Lutheran Immigration Society.

Mr. P. A. Wurtz, the well-known engineer and blacksmith, of Golden Spike, has extended his business activities to Stony Plain, and now has under construction a large and commodious blacksmith and woodworking shop on Second St. opposite Hyett & Schmidt's establishment. Mr. Wurtz will operate so soon as his building is completed.

If You Need Farm Help

for the coming Spring, let me know NOW. If you want to buy a ticket for someone in the Old Country to come out, come and see me. Permits for immigrants issued FREE OF CHARGE.

TEA "is good tea"

RED ROSE ORANGE PEKOE is the "best tea you can buy"—picked when only three days old—juicy, flavor-filled leaves. Now packed in Aluminum.

Co-Operation

Since the year 1901, when a small group of farmers under the leadership of W. R. Motherwell, now Dominion Minister of Agriculture, met in the town of Indian Head and organized the Territorial Grain Growers' Association, the plan of applying the principles of co-operation to the solution of problems peculiar to the West has found increasing favor with both people and governments until today it has come to be recognized as the most effective means of righting many wrongs and removing grievances from which the great army of producers suffered.

At the beginning of the present century people were inclined to look to government ownership as the only way out of the economic difficulties with which they were confronted. The most serious problems were in relation to the marketing of grain, and the first great achievement of the Territorial Grain Growers' Association was securing the passage of the Canada Grain Act, with its loading platform feature, which had the effect of breaking the old elevator monopoly.

That in itself was not sufficient, and an agitation was begun for government owned and operated grain elevators. This was given a trial in Manitoba, but was rejected in Saskatchewan in favor of a system of cooperative elevators, owned and operated by the farmers themselves through a joint stock company backed with financial guarantees by the Government. The government owned system in Manitoba was not a success, and the elevators there were soon handed to a farmers' organization. The Saskatchewan Co-operative Elevator Co. was a huge success and in a comparatively few years became the greatest grain handling concern in the world.

From that time onward co-operation became a word to conjure with throughout Western Canada. Co-operative creameries, co-operative stockyards, co-operative hall insurance, co-operative wool growers' associations, quickly followed. The Grain Growers' Association was duplicated in Manitoba and Alberta and spread to Ontario. Their forces were then united in the Canadian Council of Agriculture. Co-operation brought unity and in unity the producers of the West found strength.

There yet remained one great weakness in the economic condition of the West. The increasingly large grain crops of the country were dumped on the market at one time, plunging it, breaking prices below a profitable level to the producer. The seemingly impossible task of utilizing the farmers in one great co-operative enterprise to handle all their wheat and to market it in an orderly and scientific manner was undertaken through the organization of Wheat Pools. It succeeded, and the Provincial Pools organized one central selling agency. The result is common knowledge today, and the wheat pools have been followed by Coarse Grain pools, Egg and Poultry pools, Livestock pools, hay pools.

Truly enormous as have been the material gains to the producers of the West through this general acceptance of the principles of co-operation, resulting, as it has, in more orderly marketing, more orderly financing, in greater contentment all round, it is not altogether wide of the mark to say that even more significant and permanent effects have resulted.

The underlying principle of co-operation is that the strong shall help the weak, and that in the union of all still greater strength will be found. No member of a wheat pool, however large his resources, regardless of the size of his crop, irrespective of his financial strength, will realize the top price for his grain, and, equally so, no member however poor he may be, or small the quantity of his crop to market, will be forced to accept the lowest price. Strong and weak, rich and poor, resources, crops, and every member will receive the average price. In other words, some make sacrifices for the good of the many. But, in the long run, even those who seemingly do sacrifice something are the gainers because through control of the aggregate large volume of the many small producers the pool brings strength and profit to all.

Whether it is fully realized or not by even the most enthusiastic pool advocate, the fact remains that in the development of this spirit of co-operation, and in the application of co-operative principle to the everyday business of the farm, a great work of good citizenship is being performed—an educational movement of outstanding importance is being fostered.

Tens of thousands of men, having joined together to produce purely material benefits find it necessary to sink all differences of race, of creed, of political faith, and to disregard varying conditions in life. They find compromise necessary; that there must be a spirit of give and take. They make the happy discovery of each other's good qualities. Living in an atmosphere of co-operation for material gains, they unconsciously cultivate the idea. It begins to color their thought and permeate their activities. Inevitably it must display itself in municipal and school district administration. It influences church affairs. It becomes a habit, an environment affecting all community life and activities. In a word, it reflects itself in world-wide citizenship.

And the youth of today is being brought up in this atmosphere of co-operation. It is influencing the whole thought and outlook of the boys and girls of this generation, broadening their sympathies, teaching them to work together for the common good instead of at cross purposes, developing a new sense and a finer ideal of citizenship.

Babies Cry For "Castoria"

Prepared Especially for Infants and Children of All Ages

Mother! Fletcher's Castoria has been in use for over 30 years as a pleasant, harmless laxative for Castor Oil, Peppermint, Teething Drops and Soothing Syrup. Contains no narcotics. Proven directions are on each package. Physicians everywhere recommend it.

The Gloomy Bolshevik

Victims Are Struck by Depression and Dejection of People in Russia

The Bolshevik revolution is a gloomy, dismal, morbid creature, and recent visitors to Sovietland are struck with the utter depression and dejection of the hapless people who are doomed to exist there because for them there is no escape. Russia is in tragic fact an even more wretched place today than it was represented in the Russian novels of the Czarist regime, where everyone is depicted as plunged in mooping melancholy.

Let us pause for a moment to shed a tear over the sad fate of the misguided humorist who gave his wife a box of pearl tapioca for her birthday.

Going fishing—take Minard's Liniment.

May Prolong Life Span

Pennsylvania Doctor Has Announced Discovery of Valuable Serum

The span of human life may be prolonged 25 years or more by a new mercury compound called Metaphen, according to Dr. George Benjamin Raitfalch, professor of chemistry at the University of Pennsylvania graduate school of medicine, discoverer of the serum. In describing the new compound, Dr. Raitfalch said it was the strongest antiseptic and the most powerful organic compound in chemistry. He said he hoped to develop metaphen as a possible cure for tuberculosis, influenza and septicaemia.

A life span of one hundred and twenty-five years and old age of a few months instead of many years are among the future possibilities discussed by Dr. Segor Vornoff, the eminent specialist in gland operations, before an assemblage of foreign newspaper correspondents at Paris.

It has been established, said Vornoff, that some men had lived 125 years. "Therefore," he added, "and others have the right to live that long."

Sour Stomach Risings Subdued by "Nervine"

A Few Drops Bring Relief

The wonderful relief you get from twenty drops of Nervine will surprise you. Take it in sweetened water, and almost immediately you feel better. Nervine brings up the gas caused by fermentation in the stomach, that distressed feeling in the stomach. When colic or cramps strike you at night, Nervine will relieve you. For general use in the family, for emergency use, always keep timely Nervine on hand. 25c at all druggists.

Assistance to Settlers

The Manitoba Government, according to the Premier, will give special assistance to settlers within its borders this year. It will establish a bureau of information in connection with the plans for the development of unused agricultural lands. Several inspectors, acting under the Minister of Agriculture, will be appointed and will aid in placing new settlers in desirable locations.

Great Canadian Remedy Helped Him Like Magic

Saskatchewan Man Used Dodd's Kidney Pills

Mr. A. M. Paschke, Who Suffered From Backache Tells of Relief He Gained and Found.

Jedburg, Sask. (Special).—Every corner of Canada has at least one man who has found relief by taking Dodd's Kidney Pills. They have been relieved of kidney troubles all over this vast Dominion for more than thirty-five years. They relieve only kidney troubles and diseases that spring from disordered kidneys. That's why they are so popular today. Read what Mr. M. Paschke has to say about them: "I have suffered from backache for a long time and have tried different kidney remedies, but found no benefit. Finally I tried Dodd's Kidney Pills which helped me like magic. I also found them good for that tired feeling."

Dodd's Kidney Pills have become a family remedy because people have tried them and found them good. They help Rheumatism, Lumbago, Lame Back, Heart Disease and Urinary troubles, because all of these are either kidney diseases, or are caused by the kidneys failing to do their work.

Alberta is the Corn Belt

The Province of Alberta is definitely in the corn belt of North America, says a report from the Provincial Government. Although a few years ago it was producing very little corn, this has now come to be a notable item in the annual agricultural production. Last year more than \$1,000,000 worth was produced, mainly in the southern part, and the corn exhibits were favorably commented on at various seed grain fairs.

Indians Need No Boundaries

The absence of boundaries in the continent known no boundary lines and may pass to and from the United States without let or hindrance, Federal Judge Dickinson has ruled at Philadelphia. The ruling was given in the test case of Paul Diabo, of the Caughnawaga reservation of Montreal. Diabo was deported to Canada last March on a charge of illegal entry into the United States.

Minard's Liniment soothes tired feet.

Health Broken—Lost 66 lbs. Now Well, Won Back 82 lbs.

Ottawa merchant, formerly city officer, rundown by kidney trouble. Wasted from 201 to 135 lbs. Tanlac restored robust health; now weighs 217 lbs. and feels fine

Philip Seguin's grocery at 283 St. Patrick St., is well known in Ottawa. Mr. Seguin was formerly a police officer. When ill health seized him he lost weight rapidly. "I had kidney trouble for 6 years," he tells, "and was given up as a hopeless case. Many times, from sheer weakness, I have fallen where I stood, and had to be helped to my feet."

"Pains racked my entire system, especially my back, which felt like splitting. Needless to say, I could neither eat nor sleep normally. Weak nerves and nervousness would leave me trembling all over. I faded away from 201 to 135 lbs., and tried endless treatments and remedies in those 6 years, without result."

"I had begun to despair, and when a friend advised Tanlac I was skeptical. But one month's regular use of this wonderful medicine convinced me that I was on the road to health. I kept on taking Tanlac and to my delight and surprise it made me a new man in a surprisingly short time."

Now I weigh 217 lbs., eat and sleep like a healthy boy, and feel like a different man altogether. If judged, or overworked, I take a bottle of your health, try Tanlac. It is nature's own tonic, made from roots, bark and herbs. Your doctor has it. Over 6 million bottles sold.

Growth of Power Development

Quarter of Million Horse-Power Being Developed on Winnipeg River

By the close of the present year plants with a capacity of over a quarter of a million horse-power of hydroelectric energy will be installed on the Winnipeg River, Manitoba—a remarkable growth in power. When the river is fully developed about three times this amount of power will be available, so that the city of Winnipeg and district can hope to enjoy the advantages of low cost power for some time to come. The market having absorbed all the power available on his river will have to seek further fields to increase its energy supply.

The salient features of the last three years' progress are the expansion of the application of Winnipeg River power from an almost purely urban market to large individual outside industries, the co-operation of otherwise competing interests, and finally the remarkable growth of the power market in the rural districts.

Boy Immigration Scheme

Federal Government Co-Operating With the Provinces by Lending Financial Assistance

Reports reaching the Immigration Department from Manitoba indicate that Premier Drachon is favorably impressed with the boy immigration scheme, and will join up, probably, with the Federal Department. The scheme is that the Federal Department bring out the boys and makes a grant of \$50 per head to sustain them during an instruction period when they are on the farm. The farm is to be provided by the Provincial Government. Ontario and the Maritime Provinces have already come into the scheme and more than 1,000 boys will be brought out from England this year. The Manitoba Government, it is learned, already possesses a large farm which could be used for this scheme. It is located in the Hurtle district.

Envy provides the mud that fails even throws at success.

Alberta's Industries

Returns filed by the Alberta Bureau of Labor show the industrial payroll of the province in 1936 at \$14,991,086, of which the wage-earners' share was \$39,792,721.

A GREAT PUZZLE TO CAREFUL PARENTS

One of the greatest puzzles to the careful parent is to know just what medicine to give the little ones. When the child falls ill with griping pains, is seized with colic or fever, refuses food or vomits what he has taken, when he cries a great deal and cannot get the sleep so necessary to the growing child, the parent is in a quandary. What is to be done on such occasions? As often as not there is not a suitable medicine in the house.

The puzzle is what to give him to set him right quickly. It is to meet such emergencies that Baby's Own Tablets were designed. These pleasant little Tablets quickly reduce fever, break up colic, relieve constipation and indigestion and allay teething pains. They quiet the nerves and promote restful health-restoring sleep. They are guaranteed absolutely harmless and safe for even the youngest and most delicate baby.

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

What is regarded as the earliest recorded fossil forest has been unearthed in New York state.

It Has Many Qualities.—The man who possesses a bottle of Dr. Thomas' Eclectic Oil is armed against many ills. It will relieve a cough, break a cold, prevent sore throat; it will reduce the swelling from a sprain, relieve the most persistent pains and will speedily heal cuts and contusions. It is a medicine chest in itself.

Poiteness is the zero mark of love's thermometer.

Worms in children. If they are not attended to, cause colic, vomiting and often death. Mother Graves' Worm Exterminator will protect the children from these distressing afflictions.

"Of all the Gauls!" exclaimed Julius Caesar, as he stood on the mountain top and scanned the horizon.

Genuine ASPIRIN

Proved safe by millions and prescribed by physicians for

Colds Headache Neuritis Lumbago
Pain Neuralgia Toothache Rheumatism

DOES NOT AFFECT THE HEART

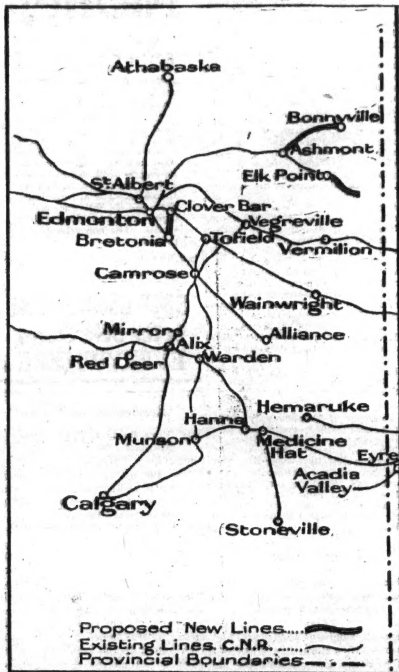

Safe

Accept only "Bayer" package which contains proven directions. Handy "Bayer" tablets. Also bottles of 24 and 100—Druggists. Aspirin is the trade mark registered in Canada, of Bayer Manufacture of Monocristalline Acetylsalicylic Acid (Aspirin). Bayer is well known that Aspirin means Bayer manufacture, to avoid the public against imitations, the Tablets of Bayer Company will be stamped with their genuine trade mark, the "Bayer Cross".

New C. N. R. Branch Lines Proposed This Year For Alberta Would Open Up New Territory

The Minister of Railways is this Session asking Parliament, on behalf of the Canadian National Railways, for authority to construct thirty-eight miles of new lines within the Province of Alberta. The first of these lines is a cut-off between Bretona and Clover Bar, just east of Edmonton. This cut-off, eleven miles in length, will make possible shorter and faster routing of freight between Edmonton and Camrose and points beyond.

The second of the colonization and development lines proposed is from Ashmont to Bonnyville, a distance of thirty-eight miles. Along this line, as proposed, there is much good land, some highly developed, but for the most part only partially developed. Beyond Bonnyville, east and north and as far as the Cold Lake district, there are areas settled and partly developed. Lack of railway communication is, however, hampering

At present trains between Edmonton and Camrose run over the circuitous route through the City of Edmonton, dropping down into the Valley of the North Saskatchewan River and crossing the river on the low-level bridge, way bridge to climb again on a very steep gradient out of the valley to the top of the bank—passenger trains then backing into the South Edmonton station.

Passenger trains now take 45 minutes to go from Edmonton station to South Edmonton station. Freight trains are limited to very light loads, partly on account of the heavy gradients on the line and because the motive power is limited by the capacity of the low-level bridge. The route via the new proposed cut-off will save eleven miles in distance for all trains, and over an hour in running time for passenger trains. Large economies in operating expenses can be made.

The new line that it is proposed to build in Alberta are in the northern part of the Province and are for colonization and development purposes. One runs in an easterly direction from Elk Point for a distance of nineteen miles, traversing good land and terminating at the North Saskatchewan River. Access to the south side of the river is thus afforded to settlers in the district, and there is a considerable area of good land on the south side of the river which will be tributary to the new line. It has been anticipated that this line would be extended to meet the branch proposed to run from Spruce Lake, Saskatchewan, in a westerly direction but the joining up of these two lines is not required at the present stage of development and traffic routing. It is felt that the new line is justified by the saving of road haul to the settlers and the creation of development work in the areas served.

Further development on account of the long road haul on farm products. The whole district, north and east of the proposed branch, is susceptible of agricultural development, with the exception of a relatively small percentage of sandy country. The precipitation is ample for grain growing and mixed farming.

Improvement in Hog Breeding

Government Gives Encouragement to the Hog Breeding Industry

The field work which the Dominion Live Stock Branch is doing in aid of the hog breeding industry is meeting with considerable success. The demand for hog grading demonstrations is continuous and they have been the means of convincing many farmers of the suitability of the bacon hog for both domestic and export trade. The boys' and girls' swing clubs have also proven to be a valuable educational feature.

So popular has this work become in the Province of Quebec that a number of representative commission agents and packing companies have sent a signed statement to the Live Stock Branch enthusiastically commending the field work of the government and suggesting that even more intensive efforts be made in districts which have already shown gains. They state that there has been a marked improvement in the type and quality of hogs offered for sale and that the improvement in hogs in terms of dollars and cents has been at least \$2.00 per hundred weight on the average quality of all stock sold.

"Hello! Is Rose there?"
"No."
"Is Violet there?"
"Is Pansy there?"
"No."
"Is Lily there?"
"No. Say, this is a drug store, not a hothouse."

A Smart Blouse and Separate Skirt

Exceedingly chic is the all-over blouse of unusual design shown here. The round neck comes to a V in front and opens over a vestee, and there are long straight sleeves and set-in pockets. View A illustrates the effective use of broad trimming, and View B depends on buttons for its adornment. No. 1541 is in sizes 16, 18 and 20 years. Size 18 (36 bust) requires 1 1/2 yards 38-inch material, or 1 3/4 yards 54-inch. Price 20 cents the pattern. Transfer Design No. 1142 is used to trim View A. Price 25 cents the pattern.

The skirt illustrated has two box-plaits in front with a slightly angled back and is joined to a dart-belted cantilever top. No. 1541 is in sizes 34, 36, 38, 40, 42 and 44 inches bust. Size 36 requires 1 1/2 yards 26 or 35-inch material, and 1 yard 36-inch lining for bodice top. Price 20 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dress-maker. Price of the book 10 cents the copy.

Viscount Grey Analyses The British Character and Tells How The Empire Has Been Built Up

"If you look at the map you will see how exceedingly small the British Isles are, yet an influence has been exercised by them in the world's history quite out of proportion to the size of the country, and an empire has been built up of an extent and character which is unprecedented and unparalleled," said Viscount Grey in a recent public address.

"It is due, I think, to three things—to the island, to the climate, and to the race. The fact that we are an island has enabled the race to develop its own character and qualities in a way it could not have done had it been part of the Continent."

"It has meant that the door to go out into the world has been specially easy to open, but there has been no entrance for other people from outside to interfere. The climate is such that it is never so cold or inhospitable as to make labor impossible or unremunerative."

"The race comes from a very stout stock. Danes, Saxons and Normans were in their time pioneers in Europe. They were the adventurous spirits, the most energetic, the most enterprising, and the most courageous. They collected here because it was the adventure of the time to come here, and being here they found themselves where they could develop unimpeded."

"It is natural that people who are pioneers should have a real passion for individual liberty, and that stands out in our history as one of the great characteristics of the race. That by itself could never have enabled the English race to do much in the world. It would have resulted in chaos. But there was something in the race which corrected what would otherwise have been the great defect of that quality."

"They became penetrated with the sense that order was necessary. The passion for individual liberty meant an intolerance of arbitrary authority, and whereas in other parts of the Continent kings might establish an arbitrary authority, the English people would not stand it. But it was not enough to overthrow the arbitrary authority of a king. It was not safe for power to remain in any single class. We are not exempt from the universal law of human nature, and no individual, and still more no class, is to be trusted with power over other classes."

"Now power is distributed throughout every class in the country, what is the future going to be? Hitherto, when any one class has abused power, the remedy has been to invest the class below it with power to protect itself. I trust now that power is distributed, that if any one class, even if it be the most numerous class, attempts to use that power solely for its own interests at the expense of

he others, it will find there is a community sense in the nation which will prevent the abuse of power."

"The sense of order has made the English race equally conscious of the fact that it will not tolerate arbitrary authority. It must at least have impartial authority to produce order. The stronger the sense of individual liberty the more essential it is that we should be penetrated with a sense of order."

"All good qualities have their defects, and one of the defects of the independence of individual character has been that we have not been a very teachable people. But every defect has its compensations and the fact that we have been a nation of amateurs rather than experts has tended to develop resourcefulness and individual initiative, and this has been some compensation for our lack of disciplined study of science."

"We have also been essentially a practical people, and one essential feature of a practical people is that they do one thing at a time, and they do not select anything for their energies unless they feel it is within the compass of their power to achieve. And having done that one thing they make it a starting point for the next and so have continuity of action. That is how the British Empire has been built up."

"When since the British race is confronted with an issue it understands to be an issue between what is right and what is wrong, there is an uplifting of conscience which is a remarkable and satisfactory thing. That core of moral and religious sense and conscience is a very real thing, but I do not like to dwell upon it because we have also a very material side."

"I have been taking these points of passion for liberty and love of order rather than any great ideal, because looking through our history you see we have had to deal with practical problems, and these qualities have been used in solving them rather than that we have gone out into the world as crusaders."

"Without our strong sense of order the very energy we had would have produced chaos; without the practical sense which made one thing lead on to another there would have been no continuity of action, and we should not have developed and grown and built up as we have."

"And but for our comparative lack of imagination we should probably have planned far too much and anticipated things beyond our compass at the time, and so to speak, when as a matter of fact we have made success."

Dairies in Denmark Mostly Co-Operative

Very Small Number Are Operated by Individual Owners

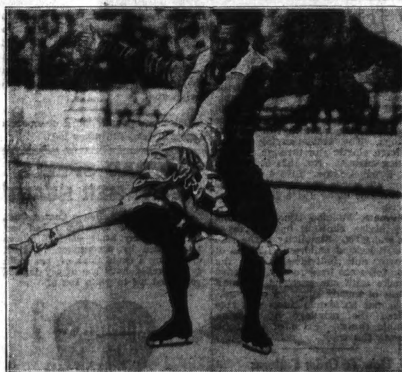

Only 260 of Denmark's 1,500 registered dairies are in the hands of individual owners, all the rest being co-operative dairies, according to the Danish paper, Tidende. Sixteen hundred of the dairies produce butter for export, and more than one-third of the butter export trade is conducted by co-operative butter export associations established in various parts of the country. The British Co-Operative Wholesale Society has establishments in Denmark for the purpose of exporting Danish agricultural products to Britain.

The African Chaperone

Among many African and Asiatic peoples girls were betrothed in infancy and kept hidden away ready for marriage. They were taken to the warriors, an elderly woman being selected to see that they were not approached by any man. When the girls reached a certain age they were permitted to "come out" into the sun and be married. Survivals of this custom are seen in our chaperone, the coming-of-age party and "coming out" into society.

Twins born of English parents in India 25 years ago, said to be as exactly alike as every detail, even to blood pressure and finger-prints. Both are now students of law in England.

Babylonian merchants sold goods on credit 4,000 years ago.

Remarkable Skating Feat

This stunt was put on at the Banff Springs Hotel Rink during the recent Winter Carnival there and excited much comment. It is pretty hard to say whether the spectators enjoyed the spectacle more than the actual performers of it, but certainly the former had not to work so hard, since it was surely easy to look at. The Banff Carnival was a great success this year and is now a fixture for good. With the opening of the new wing of the hotel and the inauguration of a winter season hardly less popular than the summer one, there can be no doubt but that Banff will be the Queen of the western amusement resorts in the near future.

WOULD REMEDY PRESENT GRAIN GRADING SYSTEM

Moore law.—Explains of the work and objective of the Wheat Pool committee investigating grain grading were given at the annual convention of the United Farmers of Canada, Saskatchewan section, Limited, by Harry Marsh, Herschel, director of the Saskatchewan Wheat Pool.

The Saskatchewan Wheat Pool formed a small committee to investigate the system of grain grading in operation in Canada, said Mr. Marsh, for the purpose of finding remedies for the faults in the present system. The committee consulted with the National Research Council of Canada, and the laboratories in Saskatchewan, Alberta and Manitoba, as well as the Dominion laboratory in Winnipeg under the board of grain commissioners, were working on the problems involved. The laboratories were endeavoring to ascertain the actual values of the present grades in flour products and whether or no the milling value of what was injured in the drying process.

The laboratories are trying to establish the actual limit of moisture that can safely be allowed in the different grades of wheat. At present the limit of moisture content is 14.4 per cent, but there is a widespread belief that this can safely be increased to 15 per cent. Without danger of the grain being damaged in its milling value in transportation.

A second point in the laboratory investigation is to establish, as definitely as possible, the relative milling values of the various grades of wheat so as to determine whether the spreads between the grades at present are equitable from the point of view of the producer of the grain.

Mr. Marsh said it was expected that the laboratories would have solved the problems involved before the 1927 crop was marketed.

The investigating committee had visited the inspection departments in Canada and the United States and as a result of their visit the committee came to the conclusion that the inspection work was being done as well as possible under the existing circumstances. It was proposed that one grain standard should apply both to primary grain inspections and to output from terminal elevators so that the average of grade leaving the terminal elevators for export would be equal to the average at the inspection point in Winnipeg.

Italian Aviator May Come to Canada

De Pinedo May Include Dominion in His North American Flight

Montreal.—Possibility of an extension of many thousands of miles of the North American continent part of the flight of the Italian aviator, Commander de Pinedo, is held out in letters received here from Italy. Under the new plan, if adopted, the aviator, instead of flying direct from New Orleans to Chicago and New York, would go via Galveston, San Diego and San Francisco, Seattle, Chicago, the province of Quebec in Canada, and New York.

Commander de Pinedo is now on the Brazil part of his European Western Hemisphere flight, and no date is set for his arrival in Canada.

France Demands Total Tonnage Geneva.—The French draft of a general treaty for the limitation of armaments, shows a continuation of the French insistence of a system of total naval tonnage in any allotment of naval strength, instead of the splitting up of tonnage by categories of warships, as advocated by the United States and Great Britain.

No Aid For Victims of Farmers Bank Ottawa.—By a vote of 163 to 56, the House of Commons rejected a motion by Hon. J. W. Edwards, (Conservative, Frontenac Addition), that the Government should grant the same measure of relief to those who suffered loss through the failure of the Farmers' Bank as had been granted to those who lost through the failure of the Home Bank.

W. N. P. 1674

To Represent Consumers

Counsel to Look After Interests of Consumers Before Tariff Advisory Board

Ottawa.—A meeting of members of the House of Commons took place the first step to provide that consumers representing consumers be permanently before the tariff advisory board when applications for increased customs tariff are heard.

During the past year consumers notably representing George Spence (Liberal, Maple Creek) appeared on behalf of the consumers, the expense being defrayed by Mr. Spence, as assisted by certain other members. However, the meeting was for the purpose of having a committee of members of the House look after it in the future. An executive was appointed but no statement was issued until the question could be more thoroughly canvassed, when another meeting will be called. There was a fairly large attendance of members not only from the West but from Ontario.

Paris Approves Idea Of Canadian Minister

But Diplomatically Appointment Is Not Considered Worth While

Paris.—The idea of a Canadian minister to France is receiving the strongest support in Paris, especially from French-Canadian trade interests, but as yet nothing is known here officially concerning the project.

It is pointed out that so far as trade between the two countries is concerned, the appointment might be opportune, but that diplomatically it hardly seems worth while.

It is believed here that Ottawa is watching the effect of Hon. Vincent Massey's appointment as Canadian ambassador to Washington and also the effect thereof, and that at the present there is little likelihood of the new policy being extended to other countries.

Many Japs Entered Canada Last Year

Majority Were Women and Children: Says Minister of Immigration

Ottawa.—Four hundred and forty-three Japanese and fifty-eight Chinese entered Canada during the year 1926, according to Hon. Robert Forke, Minister of Immigration, who replied in the House to a question from A. W. Nell, Independent, Connaught-Aldershot, Mr. Forke stated, of the Chinese, 32 had already passed out of Canada and eight of the Chinese immigrants were among the number admitted.

With regard to entrance of Japanese, Mr. Forke stated that they were divided as follows: 112 males, 216 females, and 108 children under 18. There were 108 farmers and farm laborers in the number and 151 general or unskilled labor.

Maritimes Are Pleased

Lowering of Transportation Costs Will Prove of Great Benefit

Ottawa.—"The implementing of the Duncan report with regard to transportation costs and facilities will undoubtedly be a long step toward re-instating a proper basis of transportation costs and services in the Maritimes," says a statement issued here by P. C. Cornell, who presented the case for the Maritime Government with regard to freight rates before the Duncan commission.

Mr. Cornell estimated that \$500,000 would be a conservative estimate of the amount involved in the rate reductions.

A Picturesque Farewell Wellington, N.Z.—A quaint farewell message was sent by the Maori tribes to the Duke and Duchess of York who sailed for Australia after visiting New Zealand. The message read: "Farewell to you, the snow white crane which flies but once in a life time, and to you, the inestimable high born lady, good lady."

Air Mail for Canada Ottawa.—The Government intends to establish an air mail service and to extend this for Eastern and Western Canada as conditions warrant. Hon. Fernand Robit, Secretary of State, said in reply to a question in the House of Commons, he gave no details as to when a start would be made to establish this service.

FAVORABLE TO AMENDMENT OF SEED GRAIN ACT

Calgary.—The Inter-provincial wheat pools, at the close of its conference in Calgary unanimously approved an amendment to the Seed Grain Act recently by the agricultural committee of the House of Commons recommending that the Dominion Seed Act be amended by granting the minister of agriculture power to refuse a license for any variety of wheat until its quality had been established.

A committee was appointed by the directors of the Inter-provincial pools, consisting of the Dominion Cerealist, a representative of the Canadian Seed Growers' Association, a representative of the seed boards of the provinces in which the new variety originates, and representatives of the pools.

The purpose of the committee will be to make a study of the quality of any proposed new variety.

C. H. Bennett, president of Manitoba Pool, in the course of a brief address in referring to a world wide organization stated that while some wheat pool men might have their heads in the clouds their feet were still in the furrow. They would certainly not be led away by prospect of a world pool if there was any danger of the Canadian producers suffering.

Limit Time of Speeches

New Rule of House Becomes Effective Next Session

Ottawa.—New rules of the House of Commons will become operative at the next session, the house having adopted the report of a special committee.

The house in committee of the whole approved the rule limiting general speeches in the house during debates to forty minutes, after debate on an amendment which would have added to exceptions under the rule "leaders of opposition groups." Under the new rule, no member, except the prime minister and the leader of the opposition or a minister moving a government order and a member speaking in reply immediately after such minister, or a member making a motion of "no confidence" in the government and a minister replying thereto, shall speak for more than forty minutes at a time on any debate.

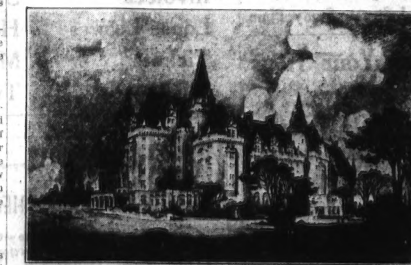

Will Be Important Port

Ten Million Being Spent on Construction at Havre

London.—Havre will be one of the most important ports in Northern France, with wharfing accommodations for the largest trans-Atlantic liners, when present construction plans are developed. Lord Kitchener announced at a general meeting of the London and Thames Haven Oil Wharves, Ltd.

Huge oil storage tanks have already been built. The whole scheme is said to involve an expenditure of about \$10,000,000. The new wharf will be able to berth the Leviathan and Majestic, side by side.

ENLARGEMENT OF THE CHATEAU LAURIER HOTEL

The illustration has been prepared from the architect's drawings, showing the appearance of the Chateau Laurier Hotel after the new building will have been added. The structural addition to the hotel will provide for another 200 rooms, making a total of 500 rooms available for guests. With the changes, banquet hall and ballroom space and other public rooms will be provided on proper scale, thus enhancing the usefulness of this fine unit of the Canadian National Railway hotel system.

British Officials Think Balkan Incident Closed

Dangerous Developments Averted by Action of Italian Government

London.—British officials "believe" the latest Balkan war cloud has now blown over. This view is based on the conference between Sir Austen Chamberlain, the foreign secretary, and the Marquis Della Torretta at the foreign office, in which the Italian ambassador gave Sir Austen the reasons for Italy's alarm over the Albanian situation.

The marquis also expressed the view that it was largely due to the prompt action of the Italian Government in informing the powers of its suspicions of Jugo-Slavia's intentions toward Albania that dangerous developments were averted.

British Street considers the incident closed. It is felt in French diplomatic quarters that the moment now is ripe to seek to remove the cause of the trouble in the Balkans by a thorough examination of the situation created by the Treaty of Trianon.

The Jugo-Slav Government, it is known, has expressed willingness to accept such procedure and it is understood that Great Britain and France are disposed to use all good offices with the Italian Government in favor of having a frank exchange of views between Italy and the Belgrade Government.

No Reciprocity Agreement

United States Will Not Enter Into Any Pact With Canada, Says U. S. Senator

Washington.—The United States won't make any reciprocity agreement with Canada along the lines suggested by Premier King, according to Senator Watson of Indiana, Republican leader.

The senator, who is a prominent member of the Senate finance committee, said Canada in any such agreement would want to exchange foodstuffs for eastern manufactured goods and this was out of the question. He asserted the farmers of the United States would never stand for their feedings having been stirred by failure to get farm roller legislation.

Confusion in Broadcasting

Movement Advocated in U. S. to Eliminate Nuisance Stations

New York.—Confusion in broadcasting due to delayed legislation cost the radio industry \$100,000,000, said L. B. F. Raycroft, vice-president in charge of the radio division of the National Electrical Manufacturers Association, in a statement.

Mr. Raycroft said that he was in favor of revoking the licenses of every station which jumped the wavelength reserved for Canadian use under the "gentlemen's agreement" of the Hoover conference of past years and added that all nuisance stations should be eliminated.

Customs Will Be Re-organized

Ottawa.—Final reading has been given to the senate to a bill providing for the reorganization of the department of customs and excise under the name of department of national revenue.

SHANGHAI MOB ATTACKS BRITISH DEFENCE PARTY

London.—Lieut. Col. Heywood, of the British defence force, and a small party of Britishers narrowly escaped mobbing and possibly death in the native city of Shanghai, says a dispatch to The Daily Mail from its Shanghai correspondent, Sir Percival Phillips.

The dispatch says Lt. Col. Heywood and his party went by automobile to the native city to interview the Chinese general, Chen, to discuss means of alleviating the general situation.

The British car was caught in a mob of students, who, shouting "kill the foreign dogs," called for the car's capture. The latter appeared in his black clothes ready to perform the duties of his office, when General Chen's bodyguard rescued the Britishers in the nick of time.

Describing the Northerners' departure, the correspondent says the retreating soldiers were like driven sheep. News of the arrival of the Cantonese spread like wildfire and the Northerners appeared to have but one object in life, namely, to gain the shelter of the foreign settlement barriers at which they had been standing only a few minutes before. The correspondent estimated that at least 1,000 Northerners were killed, wounded or captured in the fighting with the Cantonese since only about 1,700 succeeded in entering the settlement.

Financial Panic at Tokio

Banks Unable to Pay Current Writings: Draws Close for Adjustment

London.—Despatches from Tokio to the Exchange Telegraph announce a condition approaching financial panic there. Three banks announced they had "closed for adjustment," making a total of five which have been unable to pay current withdrawals since the 1st of the month.

The Bank of Japan called a meeting of bankers to consider coping with the situation, which is considered grave but not critical, being attributed to meanness over the earthquake relief legislation passed by the Diet.

London.—A Tokio dispatch to the Exchange Telegraph says the Japanese Government has stonewalled the money panic by giving assurances of unconditional support for all banks. A timely announcement of this kind in the United States, it adds, has tended materially to reassure the public.

Nevertheless, the nervous strain left financial Tokio prostrated and extremely apprehensive, and confidence will be necessarily slow in returning.

Grants To Universities May Be Discontinued

Ontario Government Cannot Undertake to Maintain Three Says Premier

Toronto.—This will be probably the last year in which the government of Ontario will advance large grants to Queen's University, Kingston, and the Western University, London, according to Premier Howard Ferguson, speaking in the Ontario legislature as minister of education.

The time has arrived, said the premier, when a halt would have to be called to the grants to those institutions. They must not expect the province could further undertake to maintain these universities, and they must look to private sources for increased assistance.

International Pool Conference

Calgary, Alberta.—Quarried here while in attendance at the inter-provincial wheat pool conference with reference to the international wheat pool conference to take place at Kansas City, Mo., early in May, George W. Robertson, secretary of the international conference, intimated that a meeting of the executive committee of the conference was to take place at Minneapolis on the 28th of this month at which time final arrangements for the programme of the conference would be made.

Congratulations From Reds

Warsaw.—The communist fraction of the Polish Diet sent a message of congratulation to Shanghai on its "delivery from imperialist oppression."

GOOD NEWS "Without money and without price"

"THE KINGDOM OF HEAVEN AT HAND"

Thousands of Churches are without ministers not
 withstanding the great need of preaching the Gospel

free free

"There is a light in the land—let us hasten
 the news of Good Tidings to all."

The people need the truth as never before. Will you do your part? The International Bible
 Students Association will supply Ministers of the Gospel free of charge on application.
 Conditions: Open the church building; admit all free, take no collection. ADDRESS:
G. A. Ware, 5 Condon Block, Edmonton
 or I.B.S.A. 270 Dundas St. W. Toronto, Ont.

Here and There

An honor was conferred upon
 Captain James Turnbull, C.B.E.,
 R.N.R., commander of the Canadian
 Pacific steamship Montclair, recent-
 ly, when he was appointed Aide-de-
 Camp to His Majesty King George V.

All golfing records were shattered
 recently when K. Tanaka, local Jap-
 anese golfer, playing on the Cana-
 dian Pacific course "Langara," scored
 a hole in one twice in one round
 of the eighteen-hole links. The first
 was obtained at the fifth hole which
 is 115 yards, and the second at the
 sixteenth hole, which is 110 yards.

During the month of January of
 the present year automobile produc-
 tion in Canada has increased 38 per
 cent. over and above the production
 for the corresponding month of last
 year, being 15,374 cars, as compared
 with 7,752 for the previous year. Al-
 most half of the cars produced were
 for export, according to the Domini-
 on Bureau of Statistics.

In memory of the late Col. George
 H. Ham, of Montreal, dean of railway
 publicity men in North America, a
 beautiful memorial porch is being
 erected over the entrance of St. John's
 Church at Whitty by the members
 of the Women's Canadian Press Club.
 The late Col. Ham died in Montreal
 on April 16 last.

Nara, Japan.—Eleven passengers
 on the Round-the-World cruise of
 the Canadian Pacific flagship Em-
 press of Scotland squeezed through
 a rectangular hole in a pillar just
 lighted colored images of Buddha
 in the Dalai Lama Temple here yester-
 day, thereby achieving, according to
 ancient tradition, the short road to
 Paradise.

The Board of Control at Toronto
 have formally accepted the offer
 made by Sir Leicester Harcourt,
 English Baronet, of Mounier's por-
 trait of General John Graves Sim-
 coe, after whom the County of Sim-
 coe was named. General Simcoe set
 up his first government at York,
 now Toronto. The painting will be
 hung in the Toronto City Hall, al-
 ready adorned with a collection of
 historical paintings recognized as one
 of the finest of its kind in America.

"Ave atque Vale" (Hail and Fare-
 well), echoed through the austere
 precincts of the Canadian Pacific
 Railway offices Board Room in Mont-
 real recently, when the Westminister
 Boys Chorus, in token of their ap-
 preciation and thanks for the care and
 the thought taken in their behalf
 during their 6,000-mile tour of Cana-
 da which they completed on March
 18, when they sailed on the C. P.
 liner Minnedosa, sang a parting song
 in Latin for E. W. Beatty, chairman
 and president of the Company, in
 whose care they had made their
 memorable journey.

Their Excellencies the Governor-
 General and Lady Willingdon will be
 given a warm welcome on the oc-
 casion of their first visit officially to
 Western Canada, the many centres
 through which they will pass are al-
 ready preparing to receive them.
 They will leave Ottawa by special
 Canadian Pacific train March 19, and
 are scheduled to arrive at Vancou-
 ver March 25. Leaving the latter
 city they will go on to Victoria the
 same afternoon and will spend a
 couple of weeks visiting points of
 interest on Vancouver Island, re-
 turning to Vancouver April 19.

Back from a short trip to England
 on Canadian Pacific and Telegraph
 business, John MacMillan, general
 manager of telegraphs of the rail-
 way, returned on C. P. steamship
 Montclair and has again taken up
 his duties. Mr. MacMillan stated
 that purchase of cables for the
 Pacific Coast in connection with the
 new overland cable wire for the
 second Australian cable was com-
 pleted during his trip. This ma-
 terial which represents a length of
 a hundred miles in two sections of
 wire, was inspected under Mr. Mac-
 Millan's supervision and will be
 shipped to this country early in
 April.

Flourishing Immigration Prospects

Pictures 1-4—Typical examples of juvenile type of immigrants to Canada. No. 1 shows 1 children who arrived alone recently. 2. Immigrants crowding the decks for a first glimpse of Canadian shores. 3. Juvenile settlers for the Dominion. 4. Children who arrived alone recently.

The active immigration season of 1927 has just opened well, according to authoritative information given out by the Department of Colonization and Development of the Canadian Pacific Railway, the largest and most effective addition to Canadian population of any similar period since the outbreak of the Great War. In the opinion of authorities it is not unreasonable for the Dominion to expect over 200,000 new citizens, or about 70,000 more than during the year 1926. During this year Canada received 126,954 settlers.

Several factors tend towards this promised increase, of which one of the most potent is the gradual evolution of systems and a development of new machinery that has made the organization well nigh perfect. Further reductions in ocean and rail rates from the British Isles have induced considerable numbers to submit to the examinations for acceptance under the cheap passage. Applications at the rate of several a day are being received. It is reported. Already

this year well over 8,000 settlers have been landed in Canada by the Canadian Pacific liners plying between this country and the Motherland. It is interesting to note that about sixty per cent of the applicants are miners and others who have some knowledge of and experience at farm work.

The volume of pertinent inquiries from United States Agriculturists with regard to western Canadian farming prospects, has been much heavier this year than for some years, is the report. This is regarded as a most reliable index to the trend of the movement. A new and significant movement to develop however is that of tobacco growers from North and South Carolina, Virginia and other states to Western Ontario, being attracted by the rosy prospects now facing the Canadian tobacco growing industry.

Though land settlement conditions have drastically changed and the tendency is to place newcomers on vacant lands within reasonable distances of the railways, it was pointed

Agitation for New Ry. Siding

A matter of some interest to the farmers in Blueberry district, is again to the front, and is the subject of some discussion; this is the plan for having a railway siding installed on the main line of the C. N. Railway on a point where the road from John P. Fuh's corner crosses the railway tracks, being 5 miles west of Stony and 4 miles east of Carvel. The promoters of the project contend this would be a great convenience to Blueberry farmers by eliminating the longer haul to town, and back their argument by pointing to the fact that the popular out-door sport at the present time is for the individual farmer to load and ship his own car of grain. To some it might come as a slight surprise when it is stated that one Blueberry farmer, Mr. Tyrkalo, intends cropping 500 acres of his land to wheat the coming season, most of this patch being fallow land.

New Clothes—Maybe!

The birds are now planning to come back, and the crocuses will soon be peeping thru! Spring! the wonder season! the season of release from the bonds of winter! The season of green grass, of budding trees, flowering crocuses, the early birds, and the full milk pail! Partly gone are the cares of winter. Soon the apparel put on chiefly for warmth, will be changed for that of appearance and style. The birds will have new plumage, the trees will have new foliage, and you will have new clothes—Hay Lake Times

Stony Plain and District.

Mr and Mrs Chas Schultz and family are leaving this week for their new home in Edmonton, near the Gubernatorial Mansion.

Mrs Reif has purchased the residence of Mr Ph Baron, on Cobblers Row. Mr Baron intends moving back to his farm south of town.

Reports from potato markets in the East are to the effect that a big slump in prices is now on; with the prospect of a still further drop in prices in the near future.

Mr W J Netty, who has been farming at Glory Hills for some time, leaves this week with his family for Regina. He is holding a sale of his effects on Saturday next, in Stony Plain.

Those radio fans in the district who were listening in on C.J.C.A. (Edmonton Journal) Monday evening last had the pleasure of hearing a discourse on the Wheat Pool, its objects, and the benefits which accrue to its patrons. These broadcasts are given every Monday evening from 8.15 to 8.45.

DIED—In South Tacoma, Washington, on March 14th, Mrs A Pitzler, aged 74 years. She is survived by two daughters—Miss E Pitzler, and Mrs L Plantz of White Rock, B.C.; and three sons, Ernest and Christie of Stony Plain, and Emil E. These were in attendance at the funeral, which took place on Thursday, 17th of March.

DIED—In Edmonton, Saturday, March 19, Hy Willie, in his 52d year. The funeral took place in Edmonton on Tuesday, March 22. Deceased left a widow and ten children. His father, John Willie, lives in Comet district, as also do his two brothers, Albert and Louis Willie. Mr Hy Willie was formerly in the implement business in Stony Plain for a number of years.

M M Mecklenburg, the well known optical specialist, will be at the Royal Hotel, Stony Plain, on Monday, April 25th. See him and see good.

The provincial and Dominion seed branches of the Departments of Agriculture are taking all possible steps to conserve the supply of seed oats in the province, due to the shortage which exists. The elevator companies are responding to the request that they store whatever seed oats are available, and it is hoped that if all elevator companies do this, rather than ship the oats out of the province.

Want to hear from owner of good farm or ranch for sale. L. Maguire, 10139 105th Street, Edmonton, Alta.

Spruce Grove News

The season of Easter has been regarded by the Church, from ancient times, as the most fitting for the administration of Confirmation. Persons to be confirmed must be thoroughly instructed in the truths of the Christian Religion, as contained in the Catechism; for no one is to be admitted to the Lord's Table who does not know the Ten Commandments, the Creed and the Lord's Prayer, or is not in a condition to examine himself, as St Paul exhorteth—1 Cor. 11. 28. Following are the names of the catechumens to be examined in St Matthew's Evangelical Lutheran Church, Spruce Grove, on Sunday, April 3, by the pastor Rev. G. Poetzsch—Edwin Schumm, John Schellenberger, Adam Coedel, Gustav Frank, Walter Goebel, Dora Baron, Ida Fischer, Christina Ott, Emily Goebel, Ruth Poetzsch. The service of Confirmation will be held on Good Friday, when the Catechumens also for the first time will be admitted to the Lord's Supper.

Mr Selwood had recovered sufficiently from his recent illness to be able to leave his room on Saturday last.

Dave Bell, the garage-man, broke the trail to the City on Saturday with his car, making the trip in a little over three hours.

Butcher McKeen shipped a mixed car of stock on Friday last to the Edmonton Stock yards.
